Stress is not a medical diagnosis, but severe stress which continues for a long time may lead to a diagnosis of depression or anxiety, or more severe mental health problems. You can reduce the effects of stress by being more conscious of the things that cause it and learning to handle them better, using relaxation techniques as well as other lifestyle changes.

Health and wellbeing Stress

Feeling stressed out over a relationship, money, or your living situation can create physical health issues. The inverse is also true. Health problems, whether you're dealing with high blood pressure or you have diabetes, will also affect your stress level and your mental health.
