This book presents the proceedings of the 1st International Conference on Water Energy Food and Sustainability – ICoWEFS 2021, a major forum to foster innovation and exchange knowledge in the water-energy-food nexus, embracing the Sustainable Development Goals (SDGs) of the United Nations, bringing together leading academics, researchers and industrial experts. It contains the work of authors from 33 countries.

We have entered a new era where business, technologies, communities, and even pandemic deceases cross borders with unprecedented speed and intensity. 2030 Agenda and 17 SDGs reflect the global community's high expectations of finally reversing the destruction of our natural and social habits, and achieving a more balanced and equitable pathways toward well-being of all. However, despite the initial efforts, the world is not on track to achieving the most of the 169 targets that comprise the goals. It is evident that we have a system problem, so we need a system solution. Authors presented a hierarchical system consisting of two-level management systems: first level—unsustainability reduction systems and second level—control system for transformations toward sustainability. The book clearly shows that implementation of systems for unsustainability reduction and for transformations toward sustainability is possible, and that sufficient knowledge is available to get started. It is designed for researchers, practitioners, and politicians.

This book highlights different roles in entrepreneurship and innovation, based on the act of setting up a new venture in the area of sustainable luxury and fashion, which also involves cognitive and motivational characteristics. It also discusses the fact that many sustainability-promoting innovations require substantial technological advances.

Over the coming decades, every academic discipline will have to respond to the paradigm of more sustainable life practices because students will be living in a world challenged by competition for resources and climate change, and will demand that every academic discipline demonstrate substantial and corresponding relevance. This book takes as its point of departure that integrating a component of sustainability into a discipline-specific course arises from an educator asking a simple question: in the coming decades, as humanity faces unprecedented challenges, what can my discipline or area of research contribute toward a better understanding of these issues? The discipline need not be future-oriented: an archaeologist, for instance, could incorporate into a course some aspects of sustainable archaeological practices in areas threatened by rapid climate change, as well as examples of sustainable or unsustainable ways of living practiced by members of the long-gone society under investigation. This book also argues that courses about sustainability need to cross disciplinary boundaries, both because of the inter-relatedness of the issues, and because students will require the ability to use interdisciplinary approaches to thrive through the multiple careers most of them will face. The contributions to this book are presented under four sections. “ Sustainability as a Core Value in Education ” considers the rationale for incorporating sustainability in disciplinary courses. “ Teaching Sustainability in the Academic Disciplines ” presents eight examples of courses from disciplines as varied as agriculture, composition, engineering, and teacher education. “ Education as a Sustainable Practice ” reviews how the physical environment of the classroom and the delivery of instruction need themselves to reflect the values being taught. The final section addresses the issues of leadership and long-term institutional change needed to embed sustainable practice as a core value on campus.

Given the three pillars of sustainability, besides the environment, the interplay of social and economic dimensions provides valuable insight into how society is molded and the key components that should be considere. In terms of social sustainability, processes and framework objectives promote the wellbeing that is integral to the balance of people, planet, and profit. Economic practices consider the system of production, resource allocation, and distribution of goods and services with respect to demand and supply between economic agents. As a result, an economic system is a variant of the social system in which it exists. At present, the forefront of social sustainability research partially encompasses the

Get Free Sustainable Millennials Attudes Towards Sustainability

impact of economic practices on people and society, with notable emphasis centered on the urban environment. Specific interdisciplinary analyses within the scope of sustainability, social development, competitiveness, and motivational management, as well as decision making within the urban landscape, are considered. This book contains nine thoroughly refereed contributions that interconnect detailed research into the two pillars reviewed.

Delivers refreshing insights from a host of scientific investigations pertaining to hospitality, leisure, and tourism while rendering an academic forum to stimulate discussion on literature, contemporary issues and fresh trends essential to theory advancement as well as professional practices from a global perspective.

Here is a complete blueprint for managing and leading the millennial generation. As we continue to take over the workforce, leaders should begin to understand what makes millennials tick and why we are so different than any other generation to come before and after. Why are millennials called lazy or entitled? What motivated millennials? How has social media transformed our way of thinking? Millennial Influence covers all of the questions and more while offering the reader some history and actionable strategies to enable them to understand better and guide millennials. For millennials looking to increase their influence, there is information on how millennial can better communicate, relate, and interact with other generations to increase work productivity. Millennial Influence is an excellent book for a light Sunday or lunch break read. "As the first book in this series, my focus was on providing insight that both millennials and other generations could use, today," says D'Vaughn Bell. He explains how his motivation for the book stems from "not spending a minute in college" and his thirst for entrepreneurship. "Entrepreneurship grants us more failures than any job ever will. This ideology is why entrepreneurs make for better business coaches and consultants. I want my book to inspire anyone looking to start a business or exceed on the corporate ladder. I may not have the experience of working directly 'for' but have worked directly 'with' many companies of all sizes." Aside from being the first generation of digital influencers, millennials are tech-savvy, constructive feedback thirsty little machines. Once business leaders and managers can grasp this concept, they can craft dominating workforces of a success-driven generation. There's a common misconception that millennials are lazy. "We're not lazy, we're just more aware of what is possible and aren't settling for social security, pension, 401K, a wide, dog, and a white picket fence." Grab your digital copy of Millennial Influence and leverage a proven way to manage, lead, and work with the different generations in the workplace.

Modeling Economic Growth in Contemporary Indonesia explores Indonesia's most recent business and economic developments with chapters covering topics such as SMEs, public companies, stock markets, government, or non-profit organizations to explain the economic growth and relevant factors.

As the world faces many serious challenges informed, courageous and mindful leadership is needed for a better future. The Tourism Education Futures Initiative (TEFI) is the collective effort of a group of innovative, thoughtful and committed scholars and industry leaders seeking to provide vision, knowledge, and a framework for tourism education programs that promote global citizenship and optimism for a better world. This book consolidates some of TEFI ' s work as it seeks to be the leading, forward-looking network that inspires, informs and supports tourism educators and students to passionately and courageously transform the world for the better. It makes the case for why change is needed, and how tourism educators can respond to that change with strategies and values-based tools. The book contains papers published in special TEFI issues of the Journal of Teaching in Travel & Tourism (JTTT), which question and explore some of the most important theoretical, conceptual and practical issues facing tourism education now and into the future. The book concludes by integrating the special issues ' key contributions with a brief conceptualisation of education futures before it outlines TEFI ' s framework for action over the coming years. Tourism educators worldwide will find that this volume serves two important purposes. On the one hand, it challenges educators to think both critically and proactively about tourism education, while on the other sharing examples of teaching and learning tools that seek to prepare our students for the future and to be global citizens that live lives of consequence. This book is a collection of articles from the Journal of Teaching in Travel and Tourism.

In providing a comprehensive overview on how to design and execute effective advocacy strategies for organizations, this book challenges the way communications used to be managed. Instead it proposes and provides tools for multilateral advocacy, where multiple actors and institutions cooperate, as a driver for corporate decisions.
