rooms, cold rooms, temperature-controlled storage areas, quarantine areas and receiving and loading bays. It may also include laboratories.

~~Supplement 8 Temperature mapping of storage areas~~

Temperature mapping is the study of temperature distribution within a temperature-controlled environment, such as industrial fridges, cool rooms, warehouses and receiving/loading bays. The mapping study identifies possible cold spots (or hot spots) and helps determine whether or not remedial actions are required.

~~WHO Annex 9: Temperature Mapping of Storage Areas~~

With suitable adjustments or options to cover the full range of temperature regimes, a standard protocol can be

used to map any storage area in the facility. 3.2. The mapping protocol should contain the following sections: Approval page and change control history.

~~Temperature Mapping of Storage Areas - FWQRC~~

Temperature mapping utilizes sensors and data loggers which identifies and detects whether a storage area maintains its temperature within its pre-defined limits. The procedure must be able to explain the temperature profile across the storage area under both empty and loaded conditions.

~~Temperature Mapping of Storage Areas for Pharmaceuticals ...~~

So for maintaining proper storing conditions (temperature, humidity and light) mapping of areas is necessary.

Temperature Mapping Of

Mapping of these areas is important for maintaining stability as temperature and humidity plays crucial role in degradation.

~~Temperature and Humidity Validation: Mapping in Storage Area~~

Temperature Mapping is performed to determine if a storage area can maintain temperature within defined limits (Fridges, Freezers, Rooms, Warehouses and Incubators etc.). Sensors are distributed throughout the unit/room in pre-defined locations to confirm it performs within pre-defined set points.

~~What is Temperature Mapping?— Thermal Compliance~~

A mapping exercise of the proposed storage area will ensure that the company will understand their storage
