volume mark an interdisciplinary and wide-ranging approach to a year, and indeed a decade, whose movements and events are still very much alive in contemporary society. The fruits of the conference are published in this volume to invite ongoing reflection and a critical discourse to a watershed moment in our history and culture.

Thomas Aquinas and William Langland inherited the dynamic metaphor of journeying as a fundamental concept of the Christian life and harnessed it to animate their magisterial texts: the Summa Theologiae and Piers Plowman. Christians' journey back to God consists in the way of charity, yet it is far from straightforward or sequential. Rather, it is impinged upon by epistemic ambiguity, our

willful continued habits of resistance, and inherent limitations on our perfection. In sum, the virtues are divine gifts humanly received, treasure in earthen vessels. Together these authors show the complexity we ourselves will find along this life's journey, enable our understanding to appreciate that complexity, and in limited ways cultivate in us the virtues they describe.

Pope John Paul's Theology of the Body catecheses has garnered tremendous popularity in theological and catechetical circles. Students of the Theology of the Body have generally interpreted it as innovative not only in its presentation of the Church's teaching on marriage and sexuality, but also as radically advancing that teaching. Aquinas and

The Theology of the Body offers a somewhat different interpretation. Fr. Thomas Petri argues that the philosophy and theology of Thomas Aquinas substantially contributed to John Paul's intellectual formation, which he never abandoned. A correct interpretation of the Theology of the Body requires, therefore, a thorough understanding of Thomistic anthropology and theology, which has been mostly lacking in commentaries on the pope's important contributions on the subject of marriage and sexuality.

In modern theological discourse, and more particularly, in theological anthropology, the evangelical counsels are rarely presented as integral parts of the human person ' s vocation in grace. Rather, theology after the Council of Trent preferred to speak about the counsels as optional obligations, taken up over the commandments, as an area of the greater generosity of those who strive for more perfection. This is why the fundamental question this work poses is: how can we formulate an intrinsic bond between poverty, chastity and obedience, and the human person ' s vocation in grace? This is a question addressed to Saint

Thomas Aquinas, as the first theologian to offer a systematic theology of religious life, whose theological vision predates the modern separation between human and divine, and between the different branches of the theological science. The Angelic Doctor situates the counsels into the dynamism of the virtue of charity which is not a static entity but implies a spiritual development. The counsels are identified as a stage of spiritual generosity and a sign of growth in charity: in a certain way, they concern every Christian. Then, according to Aquinas, the proper context of the counsels is the New Law of graced freedom: the counsels arise from the wisdom and love of Christ, the wise friend, who invites everyone to the perfection of love. These two aspects

allow for a remarkably different perception of the counsels than merely optional obligations.

Theological reflection on friendship, as a particular form of Christian love, emerges in Holy Scripture and continues to be elaborated in the Christian tradition. However, “ love of friendship ” was at times absorbed into the other traditional understanding of love— “ love of God and of neighbor. ” After a philosophical-historical study of the Greco-Roman roots of friendship in moral reflection, and how (and to what extent) this was appropriated in the Christian tradition, this book

Illustrates the transcendental character and the novelty of the Christian understanding of friendship found in Holy Scripture, focusing particularly on the most relevant texts in the Fourth Gospel where “ love ” and “ friendship ” stand to be important themes. It also shows how Saint Thomas Aquinas, through his exegesis of the Fourth Gospel, his synthesis of the Christian tradition, and his ability to rearticulate Christian theology through Aristotelian philosophy, inimitably defines the theological virtue of caritas as “ friendship with God. ” In so doing he depicts friendship as the finality, the telos, of the Christian life. Finally, the book aims to show how the retrieval of a proper theology of friendship, rooted in Holy Scripture and Christian tradition, can enrich the

Rowland showcases here the dominant contemporary approaches to doing Catholic theology. Chapter 1 offers a summary of the two International Theological Commission (ITC) documents on the discipline of Catholic theology. These documents set out the general principles which should govern any approach to Catholic theology (at least according to the ITC). The subsequent chapters each focus on one of four different approaches frequently found in contemporary Catholic academies: the approach of Thomists, members of the *Communio milieu*, members of the *Concilium milieu* and promoters of different varieties of Liberation

Theology. Rowland's work is pitched at the level of first time students of theology who are trying to make sense of the methodological choices which undergird the different approaches to Catholic theology. Rowland concludes with four appendices: a list of all Doctors of the Church, a list of all encyclicals since the 19th century, a list of the documents of the Second Vatican Council, and a list of definitions of the various Christological heresies which were the subject of the debates of the early Church Councils. These appendices will provide useful reference tables for young scholars, including seminarians.

challenging the use of violence in U.S. policy? The opportunities and developments in approaches to peacemaking have been growing at a significant rate. However, violent methods continue to hold significant sway in U.S. policy and society as the commonly assumed way to "peace." Even when community organizers, policymakers, members of Catholic leadership, and academics sincerely search for alternatives to violence, they too often think about nonviolence as primarily a rule or a strategy. Catholic Social Teaching has been moving toward transcending the limits of these approaches, but it still has significant room for growth. In order to contribute to this growth and to impact U.S. policy, McCarthy draws on Jesus, Gandhi, Ghaffar Khan, and King to offer a virtue-based

This approach is also set in conversation with aspects of human rights discourse to increase its possible impact on U.S. policy. As a whole, *Becoming Nonviolent Peacemakers* offers an important challenge to contemporary accounts of peacemaking in the U.S.
