Sailing into New York Harbor, Sigmund Freud stood on the deck and gazed upon a statue that was meant to symbolize someone else's vague notion of freedom. The embryonic field of psychology--so very interested to hear this theory, which excavated the depths of the psyche--anticipated his arrival in America with lamentably eager fanfare. Whether out of hubris or prescience Freud could only whisper, "They don't realize we are bringing them the plague." It was a theory that undercut our creative justifications for every action and belief, and it suggested our anxious identities are charted by a big Other--one we cannot begin to comprehend. As psychoanalysis undergoes a resurgence of interest within religious studies, political theory, and cultural criticism, its innovative and peculiar claims remain difficult to grasp without any guide for the perplexed. In *God Is Unconscious: Psychoanalysis and Theology*, Tad DeLay explores the provocative teaching of psychoanalyst Jacques Lacan and its implications for Christianity. Partly an introductory exposition of Freud, Žižek, and Lacan, and partly an application of psychoanalysis to religion and politics, this book is organized as a theological meditation on an incendiary theory.

In *Religion and the Unconscious*, Ann and Barry Ulanov provide a thoughtful study of the relationship between religion and depth psychology. An insightful contribution to the entire area of pastoral counseling, this book demonstrates how to combine religion and depth psychology in

order to provide more effective counseling.

In this searching study, Fr. Murchadh Fr. Ó Madagáin describes the life and thoughts of Fr. Thomas Keating, the Trappist monk who was one of the founders of the centering prayer movement. Centering prayer aims to reclaim the Christian contemplative and mystical traditions after centuries of neglect and to make it available for modern spiritual seekers. Fr. Ó Madagáin traces its roots back to the fourth- and fifth-century Desert Fathers such as Evagrius and John Cassian. He shows how it was used in the medieval classic *The Cloud of Unknowing* and practiced by saints John of the Cross and Teresa of Avila, then revived by Thomas Merton during the twentieth century. Fr. Ó Madagáin illustrates how, by bringing the insights of contemporary psychology to bear on this ancient method of prayer, Fr. Keating has not only revitalized the contemplative tradition, but also has enabled it to become a powerful tool for people of faith to gain insight into themselves and God, whom Keating calls the divine healer. Fr. Ó Madagáin also unpacks the processes at work in centering prayer and clears up some of the common misunderstandings that surround it. *Centering Prayer and the Healing of the Unconscious* is an essential work for all those interested in the history and practice of centering prayer. In addition to describing the background of this unique and effective practice, Fr. Ó Madagáin offers unique insights into the ideas of one of its leading contemporary teachers and practitioners.

*Entheogens, Society & Law* takes a major step towards a comprehensive understanding of the human condition, elucidating how empathy, meaning and purpose emerge from three intersecting areas of human life: biology, consciousness and culture.

If there ever was one word that could represent the essence of Freud's work, that word would be 'unconscious'. Indeed, Freud himself regarded his 1915 paper 'The Unconscious' as central to clarifying the fundamentals of his metapsychology. The paper delineates the topographic model of the mind and spells out the concepts of primary and secondary process thinking, thing and word presentations, timelessness of the unconscious, condensation and symbolism, unconscious problem solving, and the relationship between the system Ucs and repression. Examining these proposals in the light of contemporary psychoanalytic theory as well as from the perspective of current neurophysiology and ethology, nine distinguished analysts take Freud's ideas further in ways that have implications for both psychoanalytic theory and practice.

God is dead, but his presence lives on in politics. This is the problem of political theology: the way that theological ideas find their way into secular political institutions, particularly the sovereign state. In this intellectual tour-de-force, leading political theorist Saul Newman shows how political theology arose alongside secularism, and relates to the problem of legitimising power and authority in modernity. It is not about the power of religion so much as about the religion of power. Examining the current crisis of the liberal order, he argues that recent phenomena such as the rise of populism, the renewed demand for strong national sovereignty and the return of religious fundamentalism may be understood through this paradigm. He illustrates his argument through an exploration of themes such as sovereignty, democracy, economics, technology, ecological catastrophe, messianism and the future of radical politics, engaging with thinkers ranging from Schmitt and Hobbes to Stirner, Foucault, and Agamben. This book will be a crucial text for all students, scholars and general readers interested in the meaning and significance of political theology for political theory.
