The audio resources on this page explore three important moments in the history of the Victorian railway: the use of the first 'iron horses' to transport coal from Hetton colliery The Rainhill...

~~Victorian railways — BBC Teach~~

The Victorian Railways (VR), trading from 1974 as VicRail, was the state-owned operator of most rail transport in the Australian state of Victoria from 1859 to 1983. The first railways in Victoria were private companies, but when these companies failed or defaulted, the Victorian Railways was established to take over their operations.

~~Victorian Railways — Wikipedia~~

Victorian Railways Although there were basic railways of a sort in Britain before the Victorian times, they were simply tracks used for carrying wagons from quarries and mines using horses to carry them

along the track. This was all to change though with the invention and introduction of the steam engine throughout Britain.

~~Victorian Railways | Victorians~~

Victorian railways, although somewhat treacherous, introduced railway construction throughout the country. Victorian railways attracted passengers and goods customers due to the speed and efficiency at which they operated. It signaled to potential investors that the railways were profitable enterprises if financed and operated correctly.

~~Railways During the Victorian Era | Worldwide Rails~~

Rail was the most popular means of transport for goods and people throughout the Victorian era and well into the 20th century. In a sense, rail set the tone for 19th century "progress" and made possible the entrepreneurial successes and excesses of the Industrial Revolution.

The Victorian Railways J class was a branch line steam locomotive operated by the Victorian Railways (VR) between 1954 and 1972. A development of the successful Victorian Railways K class 2-8-0, it was the last new class of steam locomotive introduced on the VR. Introduced almost concurrently with the diesel-electric locomotives that ultimately superseded them, the locomotives were only in ...
