First published in 1971, Roy Steven's Embouchure Self-Analysis and The Stevens-Costello Embouchure Technique (Complete) is considered to be the authoritative text on embouchure analysis incorporating physical laws, scientific principles and muscular physiology in establishing a consistent embouchure for the brass player. This revised second edition by the original editor, William Moriarity, reflects the timelessness and relevance of this book. Can be used as a workbook with audio and video demos at www.roystevens.org

Musical Score

A practical approach to building range and endurance.

Embouchure Builder has been designed as a supplementary study to be used along with any standard trumpet instruction book. The studies herein are excellent for use in the warm-up period prior to each daily session of practice. The technicality of the fingerings is comparatively simple and the studies can be used to advantage by a young student with only a few weeks of formal study. This book contains much valuable material essential to successful performance not found within standard instructional material.
