## Introduction

Tutorials in introductory physics homework solutions are a series of resources and materials designed to supplement class work and the existing textbooks in physics. They are formulated, not to help the student solve physics problems, but to equip them with basic physics concepts. Like finance homework solutions, it also equips them with reasoning skills necessary for application of physics concepts.

Tutorials in Introductory Physics provides a structure that promotes the active mental engagement of students in the process of learning physics. Questions in the tutorials guide students through the reasoning necessary to construct concepts and to apply them in real-world situations. The tutorials also provide practice in interpreting various representations (e.g., verbal descriptions, diagrams, graphs, and formulas) and in translating back and forth between them.

Electric Potential and Electric Potential Energy We learned that in work power energy chapter, objects have potential energy because of their positions. In this case charge in an electric field has also potential energy because of its positions. Since there is a force on the charge and it does work against to this force we can say that it must have energy for doing work.
